Dear Environment Minister Murray Watt

Will you protect Australia's $4.2 billion dive industry?

Marine sanctuaries protect the turtles, sharks, reefs and iconic underwater places that make Australia a world-class dive destination.

They create regional jobs, support coastal communities and deliver exceptional wildlife experiences.

As leaders of Australia's recreational dive industry, we urge you to increase sanctuary protection during the upcoming review of the Commonwealth Marine Park networks.

A healthy ocean is not just Australia's natural heritage. It's our livelihood.
When oceans thrive, Australia thrives.

Stronger sanctuaries • Stronger tourism • Stronger Australia
